the first one to start and will try and outsprint the other machines. It was just this sort of unwarranted speeding which caused a deplorable accident on Broadway recently. The car in question, I understand, easily outdle army. tanced the other cars which had just begun to move at Fortieth Street and was practically uncontrollable at the time it struck its victim. While claims to be an American citizen and the traffic officer may be able to prevent this quick getting away of autos, it says he formerly owned a drug store is unjust to hold him responsible for it

The statistics to find the state of the stat

burning out? GEORGE COOK.

The coil may have been burned out because of an excessive voltage or there may have been a defect in the grimary or secondary winding. If the insulation of these windings is not in good condition a short circuit will result. An undue resistance may also cause the coil to become heated and molt the insulation, thus causing a burn out.

is the Carter car of Washington.
C., still being made? Is the stock
f any value?

H. A. ROBINSON. The Carter car is, to the best of my knewledge, manufactured by a company controlled by the General Meters Company. A lotter might bring the desired information. tile Editor:

Can you suggest some good auto-mobile school in New York City? DAN DALEY.

The Stewart Automobile School of his city is one of the best of its Who Knows Most

If my brother owns a car can I drive it without fear of arrest? I am withteen years of age. M. L. You may drive the car if the owner, your brother, is with you at the time.

Ask
Bosch magneto which has run about 10,000 miles. On low speed it will not run. I put new breakers on magneto, adjusting them according to gauge on wrench. When I put in four new Bosch plugs the motor runs worse than with the old ones. What is the exact distance to set the three point Bosch plugs? What is meant by setting gap 6 m m to 1 m m? What is the distance to set the breakers and what is meant by 6 m m?
